

**Case Minimum Requirements: Complex General Surgical Oncology  
for Fellows starting July 1, 2016  
Review Committee for Surgery**

<b>Oncologic area</b>	<b>Minimum case number</b>	<b>Multidisciplinary cases</b>
Breast	40	25
Endocrine	15	15
Gastrointestinal not HPB	50	25
Hepatobiliary/pancreatic	35	25
Melanoma/soft tissue sarcoma	30	30
Total	170	120
	70 additional cases in one or more of these oncologic areas	
Total cases	240	120
Multidisciplinary management experiences	120 with subcategorization as shown above	Can have overlap of surgical cases and cases documenting multidisciplinary management  Presented at multidisciplinary conference

**Definitions**

1. Oncologic cases are those involving neoplastic diseases, performed for a presumptive or known diagnosis of cancer, involving pre-malignant processes, and/or carried out for cancer prevention.
2. Fellows can be either primary surgeon or teaching assistant on surgical cases.
3. Multidisciplinary cases are patient case discussions in a multidisciplinary forum involving surgical and non-surgical disciplines regarding patients in whose clinical care the fellow is directly involved. The fellow must be present and involved at the conference in which the case is discussed to be able to count the case. The clinical encounter does not have to involve a surgical procedure. Multidisciplinary cases that involve a surgical procedure can also be counted as a surgical case in addition to a multidisciplinary case.
